PoolRoute Ops
OPERATIONS SOFTWARE

$49 /month, flat

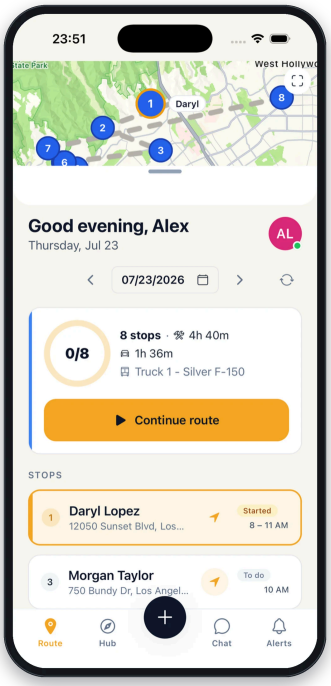

Unlimited techs. One price. One system.

Most pool companies run a scheduler, a phone app, and a separate billing tool, then retype the same visit into all three. PoolRoute Ops is one system: **the office schedules the stop, the tech runs it on their phone, the customer gets the service report, and recurring plans invoice themselves.** $49 a month whether you run two trucks or twenty.

Built by people who ran routes before they wrote software.

Your techs will actually use it.
Open the app, see today's stops in order, tap the one you're at, log the readings, snap a photo, tap done. That is the whole job. Lose signal in a backyard and it keeps going, then catches up on the road.

The visit proves itself to the customer.
Completing a stop emails the homeowner the readings, the chemicals added, the checklist and the photos. Nobody in the office assembles it, and "did you actually come out?" stops being a phone call.

WHAT YOUR TECH OPENS AT 7AM

GET PAID FOR THE WORK

- Recurring plans **invoice themselves**, one per billing period
- Card payments and saved cards on file
- Overdue tracking and a follow-up worklist
- **QuickBooks Online** connection with customer sync
- Route profit and chemical spend reports

RUN THE DAY

- Day, two-day, week and month **scheduling boards**
- Drag a stop between techs, or **optimize by drive time**
- Route map with numbered stop order per tech
- Customers, properties, equipment and service history
- Quotes, leads, inbound requests and job tracking

WHAT TECHS CARRY

- Today's stops in order, with arrival windows
- **Gate codes and property notes** on every stop
- Water readings against ideal ranges, plus an **LSI calculator**
- Before, during and after **photos**
- **Keeps working in dead zones** and uploads when signal returns

Coming off PoolBrain? We run the import for you.
You send us the login, we bring the business across, and you keep working while we do it.

Customers · Properties · Equipment · Service levels · Technicians · Routes · Six months of visit history · Water readings · Chemical doses

See it run in 90 seconds.

Ask me for the interactive demo: dispatch a stop, follow the tech through the visit, watch the office side update.

30 days free. No credit card. Unlimited technicians and office users on every account.
