# Every commercial pool, monitored and serviced from one dashboard.

Commercial and HOA pools need a daily chemistry log for the health department. Today it is kept by hand, testing varies by tech, and the property manager cannot see any of it. Smart-building platforms cover locks, thermostats and gates, but not the pool.

### DPD MONITORING

- True free chlorine by the DPD method, the inspector's chemistry, not an ORP estimate
- LTE built in: no Wi-Fi, no hub. Enter the 10-digit device ID to go live
- Automatic health-department logs, alerts and dosing recommendations

### INTEGRATIONS

- Open API and signed webhooks for every reading and alert
- Feeds property-management, access-control and pool-service platforms
- We plug into your stack. We don't replace it.

### THE FULL JOURNEY

| **Pool store** | **Counter POS** | **Field tech app** | **Commercial dashboard** | **Office** |
|---|---|---|---|---|
| Chemicals stocked and sold | Water test to products to checkout | Route, readings, photos | Every pool, live | Billing and reporting |

### Property owners & HOAs

Portfolio view of every pool, compliance logs, vendor accountability.

### Commercial operators

Daily DPD readings, alerts, fewer site visits.

### Franchise pool companies

White-label platform, franchise workflows and branding, franchisor view across locations.

**Built and run on our own 50 commercial properties at Poolify.**
